Mr. John T. Campbell, Head
NBC Monitoring Service
Caversham Park
Reading, Berks., England

Dear John:

In connection with our consideration of methods of making rapid adjustments to meet emergencies in eastern Europe, we have prepared the attached listing of FBIS resources in the languages involved. I hope that it will be of value to you in studying this problem as agreed at our last meeting.

I am sorry still not to be able to forward you a report on the African Survey but it is not yet ready. Among other things a very large number of recordings is having to be translated and transcribed by our monitors at the East Coast Bureau. Norman Kriebel was recently relieved of all other duties which were interfering with progress in working out the results of the survey and is now making faster progress.

Sincerely,

STAT
